A 3x3 grid of squares. The central square is bright red and contains a large white circle. The squares immediately adjacent to the center (top, bottom, left, and right) are a medium red and each contain a medium-sized white circle. The four corner squares are a light red and each contain a small white circle. The grid is defined by thin black lines.

Figure 1: A legend for the size and color of circles representing different combinations of two variables. The legend shows 16 combinations of two variables (0-0 to 4-4) arranged in two columns. The left column shows the color gradient from white to red, and the right column shows the size gradient from small to large. The combinations are: 0-0, 0-1, 1-1, 1-2, 2-2, 2-2, 2-3, 3-3, 3-4, 4-4, 0-0, 0-1, 1-1, 1-2, 2-2, 4-4.

A 3x3 grid of squares. The background colors of the squares are as follows:

- Row 1: Red, White, White
- Row 2: Red, White, Red
- Row 3: White, Red, Red

The circles in each square are as follows:

- Row 1: Small white circle, Medium white circle, Medium white circle
- Row 2: Medium white circle, Large white circle, Medium white circle
- Row 3: Small white circle, Large white circle, Small white circle

Figure 1: A legend for the size and color of circles. The legend shows 16 circles of varying sizes and shades of red, arranged in two columns. The left column shows circles of increasing size from top to bottom, with corresponding size labels (0-0, 0-1, 1-1, 1-2, 2-2) to their right. The right column shows circles of increasing size from top to bottom, with corresponding size labels (2-2, 2-3, 3-3, 3-4, 4-4) to their right. The circles are colored in a gradient from light pink to dark red, with the darkest red circle being the largest.
